As a skilled Web Developer and Data Analyst, I specialize in creating secure and user-friendly websites while harnessing the power of data to drive insights and inform decision-making. I focus on blending creativity with technical excellence to deliver high-quality solutions. Eager to join a collaborative team in a forward-thinking company where I can continue learning and contribute meaningfully to impactful projects.

WORK EXPERIENCE

Codsoft – Web Development Intern
April 2024 – May 2024
Remote
- As a Web Development Intern at Codsoft, I had the opportunity to work on various projects that allowed me to apply and expand my skills in web development.
- This internship provided me with a solid foundation in web development and allowed me to gain practical experience in a professional setting.

Ethical Edufabrica Pvt. Ltd. – AI ML With Data Science June
2024 – July 2024
- As an AI/ML and Data Science Intern, I had the opportunity to work on various projects that allowed me to apply and expand my skills in artificial intelligence, machine learning, and data analysis.
- Applied machine learning algorithms to analyze and interpret large datasets, uncovering valuable insights and trends.

United University - Full Stack Development June
2023 – July 2023
- As a Full Stack Development Intern, I actively contributed to multiple projects, leveraging both Frontend and backend technologies to create comprehensive web applications.
- During this internship, I developed a comprehensive tour and travel website using HTML,   CSS and Bootstrap, and integrated it with the Django framework. The website features Various services to enhance the user experience.

Projects

WEATHER FORECASTING
- Enabled features such as location-based weather forecasts, hourly updates, and severe weather alerts to ensure users have the most accurate and timely information.
- Invested my time and expertise to lead the development of a user-friendly weather forecasting website.

ONLINE E-BOOK STOREWEBSITE
- Invested my time and knowledge to lead the development of BookNest, a user-friendly online e-book store platform.
- BookNest is a website where users can browse, purchase, and download e-books across various genres and categories. The platform is capable of handling 10,000+ requests monthly, ensuring a seamless user experience even during peak traffic periods.

- Optimized the platform for speed and performance, ensuring quick page load times and smooth navigation.

TOUR AND TRAVEL WEBSITE
- Led the development of a comprehensive tour and travel website designed to provide users with an easy and intuitive platform to explore, plan, and book their travel experiences.
- The website is equipped to handle a high volume of traffic, ensuring smooth performance and reliability for users seeking travel information and services.
- Detailed information about various travel destinations, including attractions, accommodations, dining options, and local tips.
